

量子生命科学セミナー(第 137 回)

(5 研究科合同セミナー)

日時: 2011 年 9 月 12 日(月) 10:30~12:00

場所: 理学部 小会議室(E202 室) (広島大学 東広島キャンパス)

講演題目:

Research in a National Laboratory in the USA:

Multidisciplinary Approach to Energy Research

講演者: **Dr. Michel Dupuis**

(Pacific Northwest National Laboratory)

概要:

In this presentation we will illustrate many facets of computational and experimental research to address fundamental molecular research in new energy transformations. Examples will draw from photocatalysis, proton membrane transport, and homogeneous catalysis to illustrate the role of a variety of theories and methods to get at fundamental issues.
